

August 25, 2011

College of Science (COS) hosted the Expert Meeting on National Early Warning System for Agricultural Weather Management (NEWSAWM) which was organized by the World Meteorological Organization (WMO), the United States Department of Agriculture (USDA), and George Mason University (GMU). The meeting was held at the Fairfax, Virginia, campus of GMU from 18-20 July 2011, with 24 participants from nine different countries in attendance.

The goal of the the meeting is to strengthen Agro-Meteorology advisory and early warning systems for sustainable agricultural development in Africa.

The Expert Meeting on National Early Warning System for Agricultural Weather Management (NEWSAWM) was organized by the World Meteorological Organization (WMO), the United States Department of Agriculture (USDA), and George Mason University (GMU). The meeting was held at the Fairfax, Virginia, campus of GMU from 18-20 July 2011, with 24 participants from nine different countries in attendance. The session was opened by Dr. John Qu of GMU who welcomed all of the participants to the meeting. Dean Vikas Chandhoke then gave an overview of GMU activities. Robert Stefanski, WMO, welcomed all participants on behalf of Michel Jarraud, Secretary-General of WMO. He briefly discussed the various WMO meetings that lead to this meeting and project proposal. Dr. Byong Lee, President of the WMO Commission for Agricultural Meteorology, also welcomed everyone to the meeting. Ann McGuigan GMU Director, Office of Research Development and Kerry Bolognese GMU Associate Director, Federal Relations for Research also attended the meeting. The final agenda and presentations can be obtained from following web page.
